HIGH-TENSILE BARBED WIRE

Made with high-carbon Class III galvanized wire, OKBRAND High-Tensile Barbed Wire offers you another fencing alternative. Class III zinc coating provides protection in any climate or temperature. The high-tensile wire allows for a light, easy-to-handle product, reducing fence sagging. High-tensile barbed wire installation requires fewer posts due to the ability to space posts at greater intervals and eliminates the need for pre-stretching during installation.

Each roll allows for consistent unwinding with zero splices, a non-collapsible reel, and an easy handle.
